An **invoice, bill or tab** is a [commercial](#) document issued by a [seller](#) to a [buyer](#) relating to a sale transaction and indicating the [products](#), quantities, and agreed-upon [prices](#) for products or [services](#) the seller had provided the buyer.

Visit us @ [www.selleruat.ctbids.com/locations/templates/edit/5866](http://www.selleruat.ctbids.com/locations/templates/edit/5866)

[Payment terms](#) are usually stated on the invoice. These may specify that the buyer has a maximum number of days to pay and is sometimes offered a discount if paid before the due date. The buyer could have already paid for the products or services listed on the invoice. To avoid confusion and consequent unnecessary communications from buyer to seller, some sellers clearly state in large and capital letters on an invoice whether it has already been paid.

From a seller's point of view, an invoice is a *sales invoice*. From a buyer's point of view, an invoice is a *purchase invoice*. The document indicates the buyer and seller, but the term *invoice* indicates money is owed or owing.

Within the [European Union](#), an invoice is primarily legally defined by the EU VAT directive as an accounting [voucher](#) (to verify tax and VAT reporting) and secondly as a [Civil law \(common law\)](#) document.

An invoice should not be mixed up with [Proforma Invoice](#) that indicates commitment, intention, or prepayment request.

As per an earlier leak by the tipster, the iPhone 15 Pro Max might come with a 1.55 mm bezel size that will be slimmer than the Xiaomi 13. As a result, it could become the smartphone with the [slimmest bezels](#) to date.

"iPhone 15 Pro Max is destined to be a super flagship," @UniverseIce wrote on Twitter with a photo of the screen protector. The tipster has a proven track record of revealing details about upcoming smartphones. Looking at the tips, the iPhone 15 Pro Max could take the near-edgeless experience to sky level

Coming to comparison, the iPhone 14 Pro came with a bezel size of 2.17mm. The S23 had bezels measuring 1.95mm. Meanwhile, another leakster, ShrimpApple Pro, cited in a 91Mobiles report, claims that the iPhone 14 Pro Max could debut with curved bezels. Resulting in a look similar to the Apple Watch.

Speaking of more leaks, the iPhone Pro models could debut with a big 48MP primary lens on the back to compete with its premium Android counterparts. In a previous tweet, the tipster claimed the Pro Max model has an [IMX903 sensor](#). It could reportedly also have a periscope camera. As for construction, the phones may come with a titanium frame with 5 per cent extra thickness.

**Meanwhile**, the latest reports have reported that the Pro models won't debut with the much-hyped [solid-state buttons](#). It came as a [U-turn](#) to initial leaks that hinted otherwise. The hardware is now reserved for the iPhone 16 series, reports suggest.

The iPhone 15 series will likely have a USB Type-C port for charging and data transfer. Additionally, Dynamic Island could debut in the vanilla and the Plus models. In view of these upgrades, the phones could cost significantly more than their predecessors.
